

Coming Soon: Traffic Safety

← Traffic Safety starts with this!

On September 1, 2017, the State of Texas enacted a law whereby “texting while driving” was prohibited. If you are a driver, you would have to be stopped if you wanted to read, type or send a “text” message (also known as “SMS” - short message system).

Being “stopped” doesn’t only mean pulling over from active traffic, but can also imply being stopped at a traffic light.

Since “texting” has not yet been addressed by stamps issued by the USPS or other postal administrations, the exhibitor decided to have customized “PhotoStamps”© printed that address this issue.

But as a topic or theme, “traffic safety” covers a lot of areas, which the exhibitor will offer in a more comprehensive multi-frame exhibit soon. Some of the many sub-topics that relate to traffic safety are:

- Road & Lane Markings
- Traffic Lights
- Traffic Signs
- Drinking & Driving
- Wearing helmets on Motorcycles & Bicycles
- Sharing the road with Motorcycles & Bicycles
- Children playing
- Using Crosswalks
- Railroad crossings
- Wearing seat belts
- Speeding
- Obeying traffic rules & laws
- Dipping headlamps (high beams)
- Vehicle testing
- Driver training
- Proper tire pressure
- ... and many more!

This exhibitor believes that the topic of traffic & road safety requires an exhibit to help enhance awareness of this major problem: 1.3 million people each year die on roads worldwide, with 20 - 50 million more being injured or disabled! Come back next year when this should be expanded to at least 16 pages!
