The ever-present thought of this volcano erupting at any time is with the Filipinos both day and night, during the planting, tending, and harvesting of rice or while relaxing on vacation.

Over 30 eruptions have occurred since 1616. There were 79 deaths from a 1993 eruption. As a result of eruptions in 2000, 2006, 2009, 2014 and most recently in 2018, tens of thousands of nearby residents had to flee their homes
