

HORSE IMAGES OF THE SECOND WORLD WAR

When we talk about horses, we talk about power, muscle, speed, beauty, money and celebration among many other things. During the Second World War (September 1, 1939-September 2, 1945) European Countries produced a massive number of stamps. Those stamps celebrated and depicted many images, images that sometimes show power, triumph, illness, folklore, industrial revolution, militia technology and of course horses as a symbol of command, control and power. This exhibit exposes a few samples of stamps issued during the WW2 Era with this incredible and most amazing creature.
