

SAVE THE WHALES

CaptVijay Wadhwa
captvijaywadhwa@gmail.com

Whales play an amazing role in an **ecosystem** that keeps every creature on Earth alive, including you! Whales play a vital role in the marine ecosystem where they help provide at least half of the oxygen you breathe, combat climate change, and sustain fish stocks.

Visit South Pacific Year '85, Ovpt SAVE THE WHALES

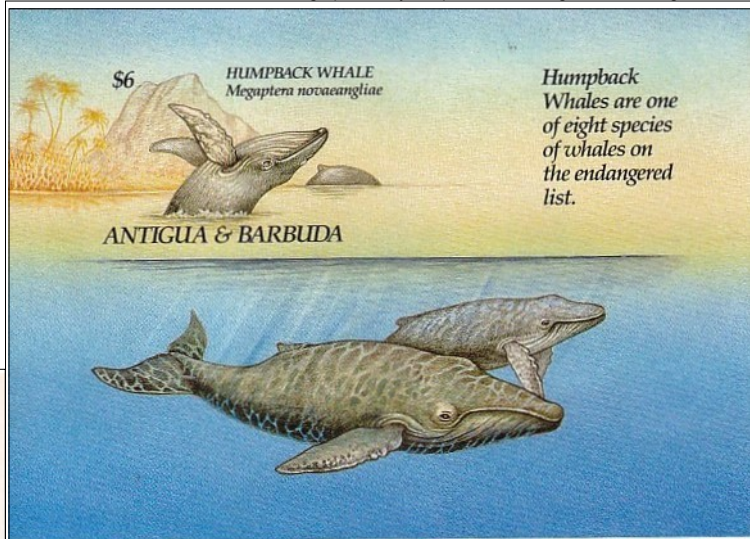

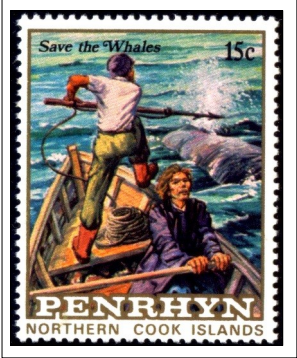

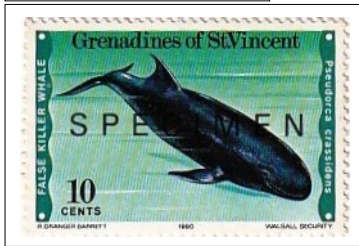

Sperm whale tooth, whale vomit and bones are sold at very high prices, by the poachers, killing whales on high seas.

Artificial jewelry made of whale bones

Human - Whale
Bond of love & care

Save the Whales was founded in 1977 when Maris Sidenstecker was 14 years old, and focuses on educating the public, especially children, about marine mammals and the fragile ocean environment. Save the Whales believes children, the future of the planet, need to be empowered and know that their actions can promote change. Education is the key to saving whales, oceans, and ourselves
